TEUCO BATHROOM SYSTEM J.M.WILMOTTE DESIGN

Teuco bathroom system,
the complete bathroom
collection designed
by J. M. Wilmotte.

Teuco presents a new range of comprehensive bathroom suites by the great contemporary designer, Jean Michel Wilmotte.

Bathtubs and shower trays, wash basins, toilets and bidets, with a huge variety of versions and accessories available, from the simplest to the most exclusive; a project where each individual item blends in perfectly with the next, creating a fully co-ordinated suite.

The chromed plate on every unit is the designer's trademark on a collection ready to make a significant mark on your bathroom.

A complete collection which makes Teuco the ideal brand to decorate and furnish your bathroom completely.

teuco

Bathtubs, versatility on all levels.

Comfortable and ergonomically designed, the acrylic bathtubs are available in several sizes and come in lots of different configurations to ensure maximum freedom of choice.

Versatility and multi-versionality are in effect the key factors of this project:

ON A FUNCTIONAL LEVEL

There's a version for every requirement:

- without whirlpool
- with Basic whirlpool in 3 versions
- with Top Hydrosilence whirlpool
- with Hydrosilence and Hydrosonic whirlpool

ON AN AESTHETIC LEVEL

You can opt for the bathtub in the built-in recessed version, or for the one with panels, choosing from different panelling solutions:

- in acrylic
- in 3 different wood finishes (oak-wood, limed oak-wood and teak).

In the versions without whirlpool, there are two more opportunities:

- glass or Duralight top to be teamed with the full-height wood finish panels
- unfinished panelling, to be customised as preferred

BASIC WHIRLPOOL

The touch screen panel lets you easily control the 6 whirlpool jets. 3 versions of Basic whirlpool are available, from the simplest one to the one fitted with a level switch and automatic sanitising.

TOP HYDROSILENCE WHIRLPOOL

8 jets provide the unique experience of the only truly silent whirlpool, designed by Teuco to eliminate all artificial noise and let you enjoy just the delicate sound of flowing water.

HYDROSILENCE AND HYDROSONIC WHIRLPOOL

Not just silence, but the additional action of ultrasound thanks to the patented Hydrosonic whirlpool designed to deeply massage individual cells (up to 2-3 cm under the epidermis). The efficiency of a spa treatment in the comfort of your own home.

CROMOEXPERIENCE

Red

Orange

Yellow

Green

Blue

Pink

Purple

White

Teuco's Cromoexperience system enhances the sensations of the water by cycling the lighting through the colours of the rainbow. A magnificent multi-sensory experience, but you can also choose to have just one colour to enjoy to the full, depending on your mood. Cromoexperience is available on all versions, starting from the one without whirlpool.

Trays, the right answer for every shower enclosure.

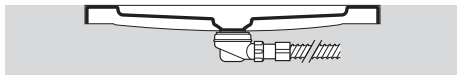

For shower enclosures, the acrylic tray, with its rigorously geometric shapes, is available in various sizes: from the square 80x80 and 90x90 to the rectangular formats 90x70, 100x80, 120x80, 140x80.

Versatile shower trays not just in terms of size, but also for their different installation options:

solution 1)

fully inset tray

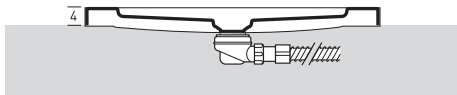

(flush with the floor effect)

solution 2)

semi-inset tray

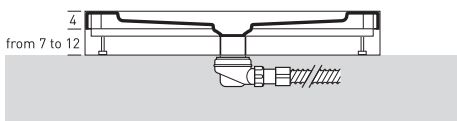

(internal basin inset, edge of the tray outside)

solution 3)

tray entirely outside

(including the basin)

These trays come with an internal basin which facilitates water containment. What's more, with the addition of the optional high-flow trap, the trays are suitable for collecting copious amounts of water, typical of large shower heads.

Teuco's added value is also the comprehensiveness of its range: for a complete shower enclosure, you can add the tray designed by Wilmotte, with an extensive choice of shower doors and Teuco water systems (taps and equipped shower panels). With all the advantages of the Teuco brand in terms of reliability and longevity.

Wash basins, core elements in a matching bathroom suite.

The essential lines and geometries of the Teuco bathroom system can also be found in the ceramic wash basins.

A shape which marks the space, in a traditional, old natural material, highly resistant and very easily moulded.

The wash basins are available in the free-standing or wall-mounted version, in different sizes, to blend in perfectly with your bathroom. They are designed to accommodate both single hole and triple hole tap sets, and are also available without holes.

Sanitary fixtures, ceramic sculptures.

The bathroom system wouldn't be complete without ceramic toilets and bidets, in the wall-mounted or free-standing versions. Here also, the designer's hand has traced fixtures with modern clean-cut lines, in keeping with the style of the entire collection.

The tap set for the bidet can be single hole or with three holes.

Coverable panels,
the coast is clear
for customisation.

Thanks to specific know-how
in panelling systems, started
in 2000 with the MYLIFE project,
Teuco offers added value to its new
bathtubs: the possibility of panelling
them in a customised style.

Indeed, to harmonise a Teuco bathtub
with your bathroom, you can
choose to panel them with acrylic
panels or ones with three
different wood finishes: oak-wood,
limed oak-wood and teak.

The most stylish and linear versions, the ones without a system, also offer further panelling solutions. To give your bathroom a unique style, the wood finish panels (full-height) can be teamed with a glass or Duralight top: the transparency of the glass or the candour of the material totally transform the appearance of the tub.

And for ever more particular tastes, the unfinished panelling system is available, to be covered as required to ensure your bathtub blends in perfectly with the remainder of your bathroom décor. Clean-cut lines on the inside, absolute style on the outside.

Acrylic bathtub

The version with the acrylic panels is the most clean-cut and essential version, and it blends in seamlessly with any décor.

Customised bathtub

For more sophisticated décors, simply choose the unfinished panelling, and then cover it as required to adapt it to your specific bathroom style.

The wooden panelling with glass top enhances the elegance of the design, with a touch of exclusivity. As an alternative to the glass top, there's the matt white Duralight® top.

Jean Michel Wilmotte explains
the Teuco bathroom system.
It is a project
inspired by water.
That becomes architecture.

“Teuco bathroom system: a sober and discrete line of bathroom fixtures that represents the natural and archetypical idea of water. It is a metaphor for water - the water that flows along a river bed before disappearing under the rocks.

The smooth metal plate is a signature that symbolises the product’s strong identity through its functionality and generous proportions – typical of stone tubs.

These objects are part of the restoration and complementary programs of architectural projects. They are a logical and material response to the design of private homes and hotels where often the elements required do not deviate from the usual range of products.

I designed this bathroom system as a natural extension of my architectural work: an essential timeless line.”

Jean Michel Wilmotte

photo by Larry Dunstan

Jean Michel Wilmotte was born in Soissons, France, in 1948. He is an architect, an urban designer as well as an interior designer. The principle underpinning Wilmotte's work is that he deals with every single aspect of a project. Inspired by Land Art, geometry and contemporary art, he draws the contours of our time with an eye to the past and one to the future.

The **Teuco bathroom system** is one of the many projects comprising his world class portfolio. Wilmotte, in fact, has worked on projects for many other leading international companies such as Artemide, Cassina, Hess, Iguzzini, JCDecaux and Zumtobel. He has also worked for many prestigious museums like the Louvre in Paris, the Chiado Museum in Lisbon and the Museum of Islamic Art in Doha, Qatar. He is currently involved with the Rijksmuseum in Amsterdam. In 2005, the designer launched the Wilmotte foundation to promote European architecture and create a new communication channel between architecture, heritage preservation and contemporary design.
