HOSPITALITY

In a world that spins fast, we create wellness oases where time slows down.

Spaces and programs dedicated to health, beauty, and self-care.

Places where body and mind regain harmony and vigour.

Because making people feel better is all that we want.

Exclusive wellness for hotels

Guests who are travelling, over their brief holiday stays, look for the pleasure of feeling well though wellness solutions that are more and more surprising and effective.

The quality and variety of products, as well as the choice of programs validated by scientific research, are the heart of our Wellness solutions.

Evocative spaces characterised by sophisticated design, combining cutting-edge equipment and innovative methods of use to offer guests extraordinary and distinctive experiences of health and wellness.

We design bespoke Wellness spaces that are complete and functional to offer guests moments of authentic well-being.

Places of the soul that celebrate thousand-year-old traditions, enhancing them with continuous innovation and unmistakable details.

HOSPITALITY

How can hotels meet the needs of a kind of traveller that is more and more oriented towards well-being and life quality?

Not just with spas and evocative environments, but also with **new formats** combining cutting-edge technologies and specific programs for stress management, sleep improvement, performance and longevity.

Constant research activity allows us to have the tools to design innovative Wellness areas to offer authentic and exclusive well-being.

Our method

The Starpool method

Our mission is to take care of people, favouring psycho-physical balance and better quality of life.

The Starpool method is based on innovation and scientific research:

focusing on individuals, we ensure benefits for both body

and mind.

We reinterpreted the cultural heritage of the spa tradition from a modern perspective. We explore the diverse facets of wellness with a multidisciplinary approach.

We work with leading figures in the fields of medicine, sport and neuroscience to provide effective and safe methods of use for our equipment.

Heat, water, and rest: back to basics

Thermalism, with its thousand-year-old tradition, is the formula that makes up our DNA: heat, water and rest are the foundation of our method.

Based on these three elements, we create innovative Wellness solutions, validated by scientific research and ensuring authentic psycho-physical benefits through actual multi-sensory programs.

The starting point of every wellness experience, heat is the fundamental element in saunas and steam baths, where the body reacts to overheating by activating the cardiovascular system and triggering beneficial perspiration.

Water is the fundamental element of cold reactions. They allow the body to rebalance its temperature after being exposed to intense heat and to trigger a series of beneficial psycho-physical reactions.

Rest is the state in which our body experiences relaxation and psycho-physical regeneration. This condition is necessary to make the most of your wellness experience.

HOSPITALITY

Our pillars

Thanks to an in-depth analysis of the needs of spa regulars and to the continuous research activity of our Scientific Research Department, we identified the areas where our technologies can have the best impact among the most significant ones for people's health: stress management, sleep quality, psycho-physical performance and longevity.

These four pillars sustain our formats designed for hotels: spa_system® pro, Longevity Spa and Recovery Class.

Each format includes **cutting-edge technologies and programs of use** that allow to work on these health goals which can
complete the spa Wellness offer or replace it.

16

THE PILLARS

STRESS MANAGEMENT

Techniques and programs designed with the aim to manage stress more effectively, understanding the reasons behind it and undertaking targeted actions to reduce its negative effects.

LONGEVITY

Solutions and tools for a healthier lifestyle, to live better and longer.

SLEEP

Techniques and tools to improve sleep quality in its main sides: necessary time to fall asleep and hours of deep sleep, representing the peak of psycho-physical rest, paramount for our overall regeneration.

PERFORMANCE

Techniques and tools aiming to achieve personal goals through the ideal combination of physical, motor, technical, mental and strategic abilities.

Our formats

spa_system® pro

spa_system® pro is an innovative format, designed to increase the performance of a high-potential place: the spa.

Developed in collaboration with a team of thermal and sport doctors, spa_system® pro allows to achieve maximum benefit through the correct usage of spaces and wellness equipment.

It is as innovative as it is easy to use, and it helps hotels and spa managers to identify the most suitable Wellness programs for their guests, allowing them to offer an exclusive, safe and effective experience.

Based on our pillars, we developed four programs that turn the spa experience into an actual prevention treatment: stress management, sleep, performance and longevity.

A **bracelet** is associated to each program, illustrating the equipment to use through icons that correspond to the description plates of the equipment in the spa. The recommended session duration to make the most of the benefits of the programs is also indicated.

The four programs perfectly complement the other services of the hotel, allowing the owners and managers to offer their guests an exclusive Wellness experience, whose value is increased by innovative solutions with a holistic approach.

Each program can be **combined with the services offered by the facility**, such as nutrition, exercising outdoors or at the gym
and beauty treatments, to target the individual needs of each
guest specifically and consistently with the globally-recognised
health goals.

Longevity Spa

Longevity Spa is an innovative format conceived for those who want to devote some space to preventive care in their facility.

In a time when health and prevention have become fundamental, more and more people want to have a chance to take care of their own psycho-physical well-being in an integrated way, even when they are travelling.

In line with our four pillars, the programs available with Longevity

Spa support stress management, sleep improvement, psychophysical performance and longevity.

The format includes a harmonious combination of technologically sophisticated equipment and specific programs of use to keep the body's natural health potential active, favouring longevity.

Our collections

Our collections

We realise each spa program with exclusive products created by designers who interpret our values in an original way.

Our collections stand out because of their **strong identity**, with a specific vocation and personality. Each product is conceived individually and is then realised on a large scale to ensure an excellent offer at a right price.

Thanks to a sophisticated engineering process, we offer exclusive design and durability, thus ensuring replicability and quality.

We offer utmost attention to details, and we create iconic elements that elevate the aesthetic value of the environment where they are installed.

The various collections are consistent with our quality choices, which include respect of both environment and territory.

Discover our collections

SPA-TAILORED PRODUCTS SPA-TAILORED PRODUCTS

SWEET COLLECTION

Uniqueness, function, style

It conveys all the passion for the Wellness culture through a unique and distinctive design. Essential shapes and aesthetic functionality make up professional solutions for business and home environments.

Design: Cristiano Mino.

SOUL COLLECTION

Colour impressions and contemporary design

It reshapes wellness tradition, offering a unique atmosphere with fascinating colours. It tailors your experience with elegant, warm, powdery shades and blends in any environment, turning into a décor item that is both beautiful and functional.

Design: Cristiano Mino.

GLAMOUR COLLECTION

Charm, tradition, and timeless elegance

Italian craftsmanship at its best with Glamour Collection, the perfect combination between fine materials and timeless elegance. This Collection brings the ancient spa traditions back to life, making them modern thanks to functional design and cutting-edge technology.

Design: Cristiano Mino.

I.CON COLLECTION

When wellness meets sustainability

Resulting from the reuse of cargo containers, it puts sustainable architecture in the service of psycho-physical well-being.
Fully equipped regeneration spaces that can be adjusted to any context and give new life to their surroundings, blending in with them and enhancing their characteristics.

Design: studio MFOR.

CLASSIC COLLECTION

Essential, practical, and elegant

Clean-cut and elegant shapes underline the simplicity of Classic Collection. The minimal lines shape the tradition of wellness bringing it into modernity. Materials, attention to detail, and innovative technologies create emotional areas where to regenerate body and mind.

Design: Starpool.

SHADE COLLECTION

Style that outlines a new kind of wellness

Original shapes made of continuous lines and distinctive modularity make Shade Collection the utmost expression of seductive warmth. A collection that turns the world of Wellness in décor items that blend in perfectly in any home environment.

Design: Cristiano Mino.

Signature products

Our Signature solutions are developed through entirely bespoke projects, from the study to the production. These products are an alternative to our collections, to meet unique needs that require equally original solutions and specially-made engineering.

Our Signature Wellness solutions have a **unique design**, enhanced by the **premium quality of the materials** and by a **cutting-edge technology** that meets every well-being requirement.

They result from the interpretation of an idea, a space, a context through tailor-made products conceived and created specifically to give shape to your own Wellness idea.

Our products

Finnish Sauna

INTENSE HEAT

It is the traditional Finnish sauna.

The dry and intense heat inside it, reaching a **temperature of about 80-100°C**, envelops the guest in an energetic embrace, **regenerating body and mind**, while the wood conveys an intense
and strong sensory experience.

The Finnish sauna is the ideal cabin where to relax, reduce stress, strengthen the airways, relax your muscles, oxygenate your tissues and train your cardiovascular system.

Our saunas are exclusive areas that are **perfectly equipped** to offer guests the **utmost comfort for self-care**, allowing to spend quality time in name of well-being.

Soft Sauna

MILD HEAT

A different way of experiencing the sauna.

Soft Sauna can be described as a **gradual heat bath**. A slow, embracing experience that enthrals the senses, stimulates body and mind, thanks to the **temperature that doesn't exceed**50-60°C with a humidity rate of 50-60%.

A wellness solution that **relaxes the body, tones and softens**the skin, reduces stress and anxiety.

It allows to welcome the guests in a new way, in an exclusive area, designing wellness programs that move away from the traditional method of use of a sauna.

Steam Room

MOIST HEAT

The lightness of heat and the strength of the steam combine to create a **Steam Room**, a regenerating oasis of absolute psycho-physical well-being.

Air, steam, and scented fragrances combine to soften the airways and gently rest on the skin, making natural exfoliation easier and increasing perspiration. The temperature of 45°C and the humidity rate of 98% relax the body in an embracing way, favouring the production of serotonin, the hormone of happiness.

An elegant and distinctive environment for guests, deriving from constant technological innovation, that offers better quality of air and steam.

Mediterranean Bath

DEEP HEAT

A unique and regenerating place that owes its effectiveness to radiant heat and enhances the warmth in a balanced way, spreading it evenly inside the cabin. In this exclusive environment, clad in stone, marble or crystal, the temperature reaches up to 45-50°C, while the humidity rate stabilises around 55-65%.

A sensory bath that favours skin elasticity, the elimination of metabolic waste, and the relaxation of back muscles.

Less known than the traditional products, the Mediterranean bath evokes the great inheritance that was left to us by the Romans, who were the first to appreciate and make the most of the benefits of heat and steam. With this in mind, we propose a place of social well-being, where the stay can be prolonged thanks to the particularly mild and pleasant temperature and humidity.

Infrared Therapy

RADIANT HEAT

Infrared Therapy offers experiences of profound well-being thanks to the heat which, through special infra-red lamps, is radiated from the ergonomic seat.

This therapy is as ancient as it is effective, and, unlike many other heat sources, it warms the body directly from within.

A space of psycho-physical restoration where **energy and heat promote localised micro-circulation**, thus relaxing muscles as well as toning and **stimulating tissue regeneration**.

At the same time, the Infrared Therapy acts on a cognitive level, promoting the processes of serotonin production and reducing stress and anxiety.

Reaction Therapy

INTENSE, MILD AND LIGHT COLD REACTION

Reaction Therapy is a **fundamental phase of the Wellness experience** where water is predominant and helps rebalance
the body functions and temperature.

After being exposed to the heat, an appropriate cold reaction stops perspiration, tones skin, favours vasoconstriction, balances the cardiorespiratory system and ensures freshness of mind.

Our professionals carefully design the areas dedicated to the correct cold reaction, to offer a complete program and ensure all the benefits of the alternation between heat, water, rest, maintaining a high standard of quality.

Kneipp Therapy

ALTERNATION BETWEEN HOT AND COLD WATER

It honours a much loved and appreciated ancient tradition, and is combined in the spas of the most prestigious hotels because of its extraordinary properties.

Kneipp Therapy is based on the perfect alternation between hot and cold water.

It has a deep action on the body, promoting blood flow and its supply to the tissues, as well as favouring fluid drainage.

Kneipp Therapy is not only a tool of hydrotherapy, but is also characterised by the elegance and emotional impact of a sensory experience expressed through **the intensity of colours and the beauty of design**. The Kneipp Therapy itineraries **can be tailored** on the needs of each spa, blending in perfectly with every context.

Experience Shower

EMOTIONAL SHOWERS

A multisensory journey in name of the fulfilment of personal well-being.

The emotional shower is a special, captivating moment, rich in fragrances and colours, to enhance or renovate the service offered in your facility.

The ideal beginning and ending of every Wellness program, with pleasant moments of pure relaxation, real evidence of the care and attention dedicated to guests.

Beauty Care

BEAUTY AND SELF-CARE SOLUTIONS

The alternation between heat, water and rest is at the basis of a new aesthetic idea, where beauty and functional wellness are reached through treatments and rituals which allow to feel good inside and out.

We provide our clients with **innovative technological solutions** developed on scientific bases, which, if **combined with traditional treatments**, maximise the benefit for guests.

The quality of our solutions is a great opportunity for any facility that aims to stand out.

Pool

THE SHAPE OF WATER

The unique, suggestive design of our pools arouses emotions.

Sophisticated and timeless materials, like ceramic, stone, steel, or fibreglass, give shape to the water.

A fulfilling experience, often irreplaceable for guests.

A unique identity trait for facilities.

Our pools are designed to become exclusive areas that enhance the beauty of the environment and attract new visitors.

Custom-designed according to specific needs, our pools make every project special and unique.

Relax

AREAS FOR REST AND PSYCHO-PHYSICAL RECOVERY

A must for every wellness program, rest is the condition in which the body is relaxed and enjoys positive sensations to experience in a comfortable, peaceful, and welcoming environment.

Our wellness formula, which is based on the alternation between heat, water, and rest, identifies this phase as the perfect ending of every Wellness experience.

It is an essential moment for the body to recover its energy and restore its physiological balance after the alternation of hot and cold temperatures.

It is for this reason that we design relaxation areas with the utmost care and dedication.

Extra components

PROFESSIONAL TOOLS AND ACCESSORIES

To complete in style the Wellness experience offered in your facility, you cannot miss out on the functional and aesthetic Extra components. A plus that defines in detail the exclusive environments developed to enhance and improve the guests' stay.

Professional tools and accessories for specific treatments, chemical and cleaning products, bath linen and fragrances. Complementary additions to live extraordinary experiences.

Health Innovation

SOLUTIONS FOR PSYCHO-PHYSICAL WELL-BEING

Solutions that aim to favour people's psycho-physica well-being, making their stay special.

Cutting-edge technologies resulting from scientific research that allow to enjoy extraordinary experiences and are a strong incentive for whomever wants to undertake regeneration programs and reactivate their health potential.

Our wellness solutions aim at mental and physical regeneration stress management improvement, immune system strengthening, and at the enhancement of perceptive, motor, and cognitive processes.

Zerobody Cryo

INTENSE COLD

Zerobody Cryo is the Starpool revolution in the world of Cold Therapy. Innovative in its simplicity, safety and accessibility, it features a **patented membran**e that wraps the body entirely ensuring a dry experience, at a functioning **temperature of 4-6°C** in a safe and non-invasive environment.

The access is gradual and makes the approach to cold therapy easier with a less intense solution that ensures the same benefits as traditional cryotherapy or immersion into icy water.

Zerobody Cryo cools off the skin, stimulating the **immune and metabolic system**. It causes a general state of well-being and specific physical and mental benefits: skin rejuvenation, reduction of muscle and joint pain, promotion of fast and effective muscle recovery, and endorphin production, thus lowering the level of stress. Perfect for a wellness offer in tune with the times.

Zerobody Dry Float

DRY FLOATATION

Zerobody Dry Float is the ideal solution to make the most of the regenerating power of the Dry Float Therapy, even in the world of Hospitality, and without the need for an operator. Highly versatile, it can be easily included both in large and in small spaces. Zerobody is indeed an effective tool that allows to regenerate body and mind in just 10 minutes: the body floats over 400 litres of warm water, without the need to get undressed or wet.

Through its intuitive software, it is possible to customise the Dry Float Therapy session with audio-guide **Brain Training** programs: Mindfulness and breathing exercises that favour complete psycho-physical balance.

Zerobody requires **very little maintenance** and only needs an electrical connection.

Molecular Hydrogen Booster

ANTI-OXIDANT EFFECT

An easy-to-use, cutting-edge technique that, thanks to a **practical portable intranasal system**, offers a large variety of psycho-physical benefits: it counteracts the harmful effect of free radicals, delays cell ageing, and slows down skin slackening and wrinkles formation.

As a matter of fact, molecular hydrogen is a **powerful antioxidant** that acts on memory and focus: it favours cognitive
enhancement, reduces the sensation of fatigue, relieves anxiety
and improves the ability to fight stress.

In addition, it has an anti-inflammatory effect that improves, for instance, first and second degree cellulite.

Photobiomodulation Therapy

LIGHT ENERGY

A therapeutic technique based on low-frequency light energy emissions, which penetrates the cells through the skin, giving them new energy and making them function more effectively. Light that gives balance to the whole body, reducing inflammation and oxidative stress.

Photobiomodulation can have a beneficial effect on brain cells, favouring focus and mental sharpness.

It is also a valuable support for the **health and beauty of your skin**: it favours the production of cell energy, improving the intake of nutrition and oxygen, and it boosts collagen production. Your skin will then appear brighter, more hydrated and smoother.

Ice Bath

ICE-COLD BATH

Ice Bath is a simple and versatile solution to enjoy actual **baths** in icy water and have all the benefits of the cold therapy. Ideal for recovery in professional sports and gyms, it is available in two versions: pro, designed to be used simultaneously by 3-4 athletes; personal, perfect for individual use.

lce Bath is designed to be used at an operating temperature
between +4°C and +8°C. However, the technology allows to set
the water temperature up to a maximum of +38°C.
The installation of two adjacent pools then allows Ice Bath
to turn into an effective solution for the beneficial alternation of
hot and cold temperatures of the Kneipp Therapy

Wellness Coach

MENTAL WELLNESS

Our **Wellness Coach** is the interactive virtual guide for authentic well-being that is always right at hand.

Each piece of content is designed to promote psycho-physical recovery into actual experiences of deep regeneration.

Mindfulness, breathing techniques and relaxing music can be used in combination with body treatments and can be an integral part of every wellness program to enhance their effects and make the experience beneficial and fulfilling.

The Personal model, equipped with noise-cancelling headphones, was developed to boost individual treatments.

The Social model, equipped with a Bluetooth high-quality loudspeaker, is the ideal solution for immersive experiences even in shared environments.

Outdoor wellness

WELLNESS IN CONTACT WITH NATURE

The popularity of outdoor wellness is connected to a growing interest in travels and open-air experiences, and to the desire of spending more time in contact with nature.

Our outdoor wellness draws inspiration from nature, a complex and wonderful system that welcomes **unique spaces of regeneration and relaxation**, designed to meet every need in terms of health, beauty, and self-care.

Our solutions blend in the surrounding environment thanks to consistent choices in terms of sustainability and respect of nature.

Discover more our Outdoor wellness

OUTDOOR SOLUTIONS OUTDOOR SOLUTIONS

I.con Collection

I.con Collection is the **great outdoor innovation in name**of sustainability. It is the result of the reuse of cargo
containers, transformed in exclusive spaces where
to regenerate body and mind.

This collection consists of enchanting places of refuge, a Finnish sauna and a relaxation area, respectively in the **I.con Sauna** and **I.con Relax** versions.

The available types of outfitting - **mountain**, **urban**, **beach** - define an extremely versatile style, both for the interiors and the exteriors, which blends in perfectly with the surrounding environment enhancing its characteristics.

Design: studio MFOR.

Nature Sauna

Nature Sauna was developed with the goal of offering people an experience of total immersion in the landscape.

A project that pulls together design and nature, communicating with its surroundings and creating a deep connection with the environment.

Nature Sauna was designed to create a synergy and evolve together with its surroundings.

Available in the new personal version, for home use, and in the social version for a shared use in spas.

Design: aledolci&co.

Our services

OUR SERVICES OUR SERVICES

Our services

We realise **bespoke environments** – unique in their solutions and details – starting from the specific needs of our clients.

We support them in the **choice of the best combination of products and service**s and in each phase of the project.

We study the **concept** and its feasibility, and we provide all the useful information to create any desired wellness solution.

Facilities can count on our experience for the **training** of their employees, to make sure that the guests, who are more and more attentive to health, prevention, and well-being, have all that they need.

Discover more about our services and the consulting packages designed just for you

CONSULTING

Our professionals are by your side in every phase of your Wellness project to help you make the most of every product you choose. We'll support you from the idea to the final realisation, helping you to identify the best solution in terms of sustainability, management, function, and design.

TRAINING

We offer training courses where it is possible to meet our best wellness professionals. Highly qualified personnel who can offer Wellness competence in terms of management, promotion and communication of the offered services. We share our long experience also through training courses that are specifically designed to suit context, facility, and individual needs.

ENGINEERING

We create and give shape to any request, even the most unique, and we provide all the useful information to create any desired wellness solution. We provide for careful monitoring and guaranteed high quality in all production processes. Technical, engineering, and mechanical supervision in each phase of the project. Our R&D department works constantly to provide the technical documentation required to realise every project.

TECHNICAL SUPPORT

We provide fast and constant technical support, covering the hardware and software as well, thanks to our specialised technicians who give assistance to our clients in the shortest possible time. Our Control Room allows us to monitor each piece of equipment remotely, ensuring prompt, inexpensive action to prevent anomalies and malfunctions.

Sustainable spa

THE SUSTAINABLE SPA

THE SUSTAINABLE SPA

Smart Technology

Sustainable products and technologically performing systems contribute to defining the quality standard of each activity.

Eco Spa Technology is the name of the software solutions that we propose to reduce our products' energy consumption, as well as improve and automate their functions. Technology in the service of our clients to increase connectivity to a computer network which is more and more sophisticated and, at the same time, user- easy.

The remote management of our every realisation, ranging from the room temperature parameters to the scheduling of the switching on and off of the cabin, as well as remote predictive maintenance, ensure constant consumption monitoring and a reduction in maintenance costs.

To make wellness more and more accessible and smart.

Discover more about our technological solutions and innovations

GREEN PACK

Our Research & Development department developed a system to improve the functions of our products. By installing Green Pack, it is possible to **reduce energy consumption** thanks to **smart detectors** that prevent needless steam leakage, control the heat and humidity of the environment and maintain a constant temperature through the energy load management. A **sophisticated system that allows** an average of 20% energy saving.

SIM 4.0

Telemetry of each installed spa product, a software that allows to constantly measure the essential parameters of the equipment. It monitors the usage of the products, detects any drop in performance, as well as anomalies and alarms. It controls the energy load in real time, so that it is possible to intervene before the problem occurs. Its Business Intelligence provides a report showing the spa performance, the guests' preferences, and the equipment energy consumption, in order to favour optimum management of the spa.

DEEP CLEAN

It is a software that generates **programmable automated cycles** of thermal shock to **achieve over 95% disinfection**. This process involves a forced increase in temperature inside the products, eliminating impurities and pathogens.

Control Room

Our Control Room was designed to **monitor** each piece of equipment **remotely**.

From here, we can support every client ensuring **prompt**, inexpensive remote action to prevent anomalies and malfunctions.

Remote observation and feedback allow us to draw up an accurate statistical analysis of the equipment, which also allows us to optimise its use depending on the real needs of the clients, thus perfecting energy efficiency.

We have entered the era of "predictive maintenance", a further advantage for our clients, who canbenefit from our technical support before the problem even occurs.
